EXPERIENCE

GTM Engineer / Campaign Manager | July 2025 - March 2026 | Lead Pioneer – Remote (Germany)

Responsibilities:

Lead Pioneer is a Germany-based outbound lead generation agency that helps B2B clients generate pipeline through cold email and LinkedIn outreach.

- Managed outbound campaigns across 6 active client accounts simultaneously, handling everything from initial setup to monthly reporting for each account.
- Built and maintained cold email infrastructure using Clay, Instantly, Apollo, HeyReach, n8n, Make, and Claude Code, including domain configuration, inbox warmup, and sequence management.
- Sourced, enriched, and validated lead lists using D7 Lead Finder, Findymail, Email Guard, and Company Enrich, processing datasets ranging from 5,000 to 20,000+ contacts per campaign.
- Wrote, tested, and optimised cold email sequences across English and German-language campaigns, achieving an average 2% reply rate with around 1 in 5 replies converting to a positive response.
- Managed campaign deliverability health, including SPF, DKIM, and DMARC configuration, inbox warmup monitoring, and sender reputation management across all accounts.
- Ran A/B tests on subject lines, messaging angles, and targeting criteria to improve campaign performance over time.
- Managed cross-client workflows and coordination through ClickUp and Notion.

Key Tools: Clay, Instantly, Apollo, D7 Lead Finder, Email Guard, Findy Email, Google Drive, ClickUp, Notion, HeyReach, Company Enrich, n8n, Make

Proof of Work:

Generated €50K in new pipeline for a manufacturing client within 2 months. The client asked to pause the campaign because their team could not keep up with the volume of leads coming in.: <https://www.loom.com/share/9c3432e44530422399f4fe41d7eb85d0>

Built a guided outbound skill in Claude Code that walks operators through cold email infrastructure setup, lead sourcing decisions, and campaign copywriting through a structured question-and-answer process.

GTM Engineer / Clay Operator | March 2025 - June 2025 | High Ticket Agency

GTM Engineer / Clay Operator Responsibilities:

Database Management

- Extracted data from platforms such as Apollo, LinkedIn Sales Navigator, and other sources according to criteria defined by the strategist
- Performed data cleaning and validation to ensure up-to-date and accurate information
- Enriched databases with relevant information using AI tools

Campaign Preparation

- Configured campaigns on platforms such as Smartlead, Email Bison, and other automation tools
- Implemented email sequences and LinkedIn messages according to the strategic plan
- Conducted A/B testing to optimize open and response rates

Technological Integration

- Managed integrations with Clay.com and other platforms for data enrichment
- Configured and maintained email senders to maximize deliverability
- Implemented automation solutions to connect different tools in the technology stack

Compliance and Security

- Ensured all campaigns comply with regulations such as GDPR, CAN-SPAM, and other applicable regulations
- Maintained data security and protected confidential prospect information
- Documented processes to ensure consistency and quality in implementation

Campaign Manager | July 2024 – February 2025 | Vortex Capital

- Cold Email Outreach: Successfully executed targeted campaigns utilizing platforms such as SmartLead, Lemlist, LinkedIn Sales Navigator, Apollo.io, and Instantly to enhance engagement and drive responses.

- **Inbox Management:** Managed lead communication to ensure prompt replies and effective follow-up processes, maintaining a high level of interaction with potential clients.
- **Lead Generation:** Employed tools including Apollo.io, Snov.io, LinkedIn Sales Navigator, Zoominfo, and website scraping techniques to identify and acquire potential leads tailored to business needs.
- **Domain Setup:** Oversaw the configuration of email domains, including DKIM, DMARC, and SPF, as well as implemented email warm-up strategies to improve deliverability.
- **List Building:** Developed targeted lead lists aligned with the Ideal Customer Profile (ICP) using advanced tools such as Apollo and Clay, fostering more effective outreach efforts.
