SUMMARY

GTM Engineer with 2+ years building outbound systems, targeting strategy, and data pipelines across 10+ B2B clients spanning multiple industries and markets. Comfortable owning the full stack, from ICP development and signal-based sourcing through to deliverability and campaign performance, using APIs, automation, and AI tooling including Claude Code.

EXPERIENCE

GTM Engineer / Campaign Manager | Lead Pioneer, Remote (Germany)

July 2025 – March 2026

- Owned targeting strategy and outbound systems across 6 concurrent B2B client accounts, translating each client's offering into a working ICP and adjusting targeting criteria based on which segments actually converted.
- Built and maintained sourcing and enrichment pipelines (Clay, D7 Lead Finder, Findymail, Company Enrich) to identify and validate prospects beyond basic firmographic filters, processing 5,000–20,000+ contacts per campaign.
- Owned deliverability end-to-end across all accounts, including SPF/DKIM/DMARC configuration, inbox warmup, and sender reputation monitoring, treating it as an ongoing system to manage rather than a one-time setup.
- Wrote and optimised English and German-language cold email sequences, running structured A/B tests on subject lines, angles, and targeting criteria; achieved a 2% average reply rate with ~1 in 5 replies converting to a positive response.
- Fed campaign performance data back into targeting decisions each cycle, adjusting ICP and segmentation based on what actually generated replies and pipeline.

Key Tools: Clay, Instantly, Apollo, D7 Lead Finder, Findymail, HeyReach, Company Enrich, n8n, Make, Claude Code, ClickUp, Notion

Built a guided outbound skill in Claude Code that walks operators through cold email infrastructure setup, lead sourcing decisions, and campaign copywriting through a structured question-and-answer process, a reusable system rather than a one-off campaign.
(loom.com/share/71ad86a36440459396ebe61751452374)

Proof of work: Generated €50K in new pipeline for a manufacturing client within 2 months by refining the ICP mid-campaign based on which segments were converting. Volume ultimately outpaced the client's capacity to follow up. (loom.com/share/9c3432e44530422399f4fe41d7eb85d0)

GTM Engineer / Clay Operator | High Ticket Agency

March 2025 – June 2025

- Sourced and enriched B2B databases (Apollo, LinkedIn Sales Navigator, Clay.com) against strategist-defined criteria, and configured campaigns on Smartlead and Email Bison with A/B testing and GDPR/CAN-SPAM-compliant deliverability setup.

Campaign Manager | Vortex Capital

July 2024 – February 2025

- Ran cold email campaigns across SmartLead, Lemlist, Apollo.io, and Instantly, building ICP-aligned lead lists and owning domain setup and deliverability (SPF/DKIM/DMARC, inbox warmup) through to conversion.

Senior Business Development Manager (Contract) | Gabby Software Engineering, TX, US (Remote)

May 2024 – July 2024

- Built a web scraping method to generate warm leads from Upwork and ran outbound campaigns via CRM, alongside market research and cross-functional collaboration with marketing and product.

Earlier Experience: Wholesale Sales Manager, Jondus Trading Co. Ltd. (2010–2024) · Customer Support Representative, Utimcredit (2023) · Social Media Marketing Specialist, Litdesign Digital (2020–2021)

SKILLS

GTM Strategy: ICP development, buying signal identification, segmentation, intent data, deliverability management

Technical: Clay, Instantly, Apollo, n8n, Make, Claude Code, APIs and automation tooling, CRM systems (Salesforce, HubSpot), data visualisation (Tableau, Power BI)

Other: Market analysis, strategic planning, project and KPI management, cross-functional leadership, presentation and communication skills
